## 1. Introduction

Please read the instructions for authors first before preparing your manuscript. These instructions are provided at the conference web site.

Type your main text here. Use section headers if needed. Because of page limitations you may choose to omit section headers in order to save space.

Figures should be provided as Encapsulated Postscript (EPS) files. Using EPS files has the advantage that figures will fit into the available space when configured appropriately.

Dummy Text:

## 2. Summary

References should be consecutively numbered in the text [in square brackets] according to their order of appearance. The format is: Authorlist, Journal, Volume, (Year), Page Number[1]. In order to save space in citing publications with a large number of authors the abbreviated form "first author et al." can be used[2].

Put acknowledgements at the end of the text before the references.

## 3. Acknowledgement

This work is supported in part by ...
