

CONTENTS

PREFACE

K. Kimura

LIGHT SOURCE & BEAMLINES

1. Single Bunch Operation at the UVSOR Storage Ring
H. Yonehara, T. Kasuga, M. Hasumoto, T. Kinoshita and G. Isoyama 1
2. Construction of a Superconducting Wiggler
H. Yonehara, O. Matsudo, T. Kinoshita, E. Nakamura, J. Yamazaki,
M. Hasumoto, K. Sakai, T. Kasuga, and G. Isoyama 2
3. Status of Grasshopper monochromator at BL2B1
A. Hiraya, K. Fukui, K. Tohji, K. Sakai, E. Nakamura, and M. Watanabe 4

RESEARCH ACTIVITIES

1. Photodissociation Dynamics of HCN in 135 - 145 nm
T. Nagata, K. Kanda, T. Kondow, A. Hiraya, and K. Shobatake 5
2. Photochemistry of Rare Gas-Dihalogen Van der Waals Molecules
I. Absorption and Fluorescence Excitation Spectra of Rg_n-Cl_2
K. Tabayashi, A. Hiraya, and K. Shobatake 6
3. Photochemistry of Rare Gas-Dihalogen Van der Waals Molecules
II. VUV Excitation of Xenon Dichloride ($Xe-Cl_2$)
K. Tabayashi, A. Hiraya, and K. Shobatake 8
4. Decay of the 4d Hole States of Xe Studied by Photoelectron-Photoelectron
Coincidence Spectroscopy
K. Okuyama, J. H. D. Eland, and K. Kimura 10
5. Dissociative-Ionization Processes of CO_2 and CH_4
Y. Sakai, B. S. Min, T. Mori, T. Takayanagi, T. Hirayama, S. Nagaoka,
and K. Kimura 12
6. Selective Photoionization of O_2 in a Framework of Van der Waals Molecules
M. Ukai, K. Kameta, K. Shinsaka, Y. Hatano, T. Hirayama, S. Nagaoka,
and K. Kimura 14
7. Negative-Ion Mass Spectrometric Study of Ion Pair Formation
in the Vacuum Ultraviolet
K. Mitsuke, S. Suzuki, T. Imamura, and I. Koyano 16
8. The Study of the Ion-Pair Process $SF_6 \rightarrow F^- + SF_5^+$ Using Synchrotron Radiation
S. Suzuki, K. Mitsuke, T. Imamura, and I. Koyano 18
9. The Study of the Ion-Molecule Reaction $Ne^+(^2P_{3/2}) + OCS$
Using Dodecapole Ion Beam Guide.
S. Suzuki, K. Okuno, T. Imamura, and I. Koyano 20

10. Angular Distribution of Positive-Ion Pairs Produced by Dissociative Double Photoionization of OCS T. Masuoka and I. Koyano	22
11. Dissociative Double Photoionization of CH ₃ F Studied by Photoion-Photoion Coincidence Method T. Masuoka and I. Koyano	24
12. Anisotropic Angular Distribution of Fragment Ions in Dissociative Double Photoionization of CH ₃ F T. Masuoka and I. Koyano	26
13. Dissociative Double Photoionization of OCS Studied by Mass Spectrometry and Coincidence Method T. Masuoka and I. Koyano	28
14. Dissociative Double Ionization Following Valence and Al:2p Core Level Photoexcitation of Al(CH ₃) ₃ S. Nagaoka, I. Koyano, and T. Masuoka	30
15. Cause of Excimer Laser Induced 4.8 eV Optical Absorption and 1.9 eV Luminescence in High Purity SiO ₂ Glasses K. Awazu, H. Kawazoe, and M. Yamane	32
16. VUV Laser-Induced Oxygen Desorption in SiO ₂ K. Kurosawa and Y. Takigawa	34
17. Luminescence Process of O ₂ ⁻ Center in Alkali Halides S. Hongo, H. Murata, and R. Kato	36
18. Stability of Free-Holes in LiBr K. Fujiwara, S. Tanaka, S. Nagata, M. Nakayama, H. Nishimura, T. Komatsu, and S. Hashimoto	38
19. Self-Trapped Exciton Luminescence in Na _{1-x} K _x I and K _{1-x} Rb _x I Mixed Crystals M. Itoh, S. Hashimoto, and N. Ohno	40
20. Luminescence from Self-Trapped Excitons in NaBr and KBr K. Kan'no, K. Tanaka, H. Kosaka, Y. Nakai, and K. Toyoda	42
21. Photophysical Processes in Poly(N-vinylcarbazole) A. Itaya and H. Sakai	44
22. Lifetimes and Luminescences of p-Terphenyl Crystals K. Uchida, S. Sato, Y. Takahashi, and E. Ishiguro	46
23. Time-Resolved Fluorescence Microspectroscopy of Muscle Fibers Using Synchrotron Radiation from UVSOR M. Taniguchi, S. Toyonaga, N. Watanabe, and K. Osada	48
24. Core Excitation Spectra in CdCl ₂ -CdBr ₂ Mixed Crystals M. Fujita, H. Nakagawa, N. Kitagata, A. Fukumoto, H. Matsumoto, T. Miyanaga, M. Watanabe, and K. Fukui	50

25. Ba N _{4,5} Absorption Spectra of Ba-Compounds M. Kamada, H. Yamamoto, and O. Aita	52
26. Pb 5d and Te 4d Absorption Spectra of Crystalline and Amorphous PbTe K. Fukui, T. Saito, S. Kondo, and M. Watanabe	54
27. EXAFS Study of KH ₂ PO ₄ in the Ferroelectric Phase and the Paraelectric Phase T. Kosiba, H. Kasatani, Y. Nishihata, K. Sakaue, Y. Noda, and H. Terauchi	56
28. Na K-edge XANES/EXAFS on Structure of Sodium Catalyst for Coal Gasification H. Yamashita, S. Yoshida, and A. Tomita	58
29. Doping Effect of Sodium and Sodium Ion on Magnesium Oxide and Aluminum Oxide G. Zhang, T. Tanaka, H. Hattori, and K. Tanabe	60
30. Mg K-Edge Absorption Spectra of Magnesium Oxide Species Formed in Mg-Exchanged Y-Type Zeolite (II) T. Tanaka, H. Tsuji, G. Zhang, H. Hattori, and T. Murata	62
31. Absorption Coefficients of Al, Ti, Ni, Cu, Ag and Au Thin Films in the 1-5 keV Region M. Watanabe, O. Matsudo, K. Sakai, J. Yamazaki, E. Nakamura, and K. Fukui	64
32. K Absorption Spectrum of Solid Ne A. Hiraya, K. Fukui, M. Watanabe, T. Murata, and P. Tseng	65
33. Comparative Angle-Resolved Photoemission Study of Bi ₂ Sr ₂ Ca _{1-x} Y _x Cu ₂ O ₈ (X=0.0 and 0.5) H. Matsuyama, T. Takahashi, K. Kamiya, H. Fujimoto, K. Seki, S. Sato, and H. Inokuchi	66
34. ARUPS Spectra of Amorphous and Crystalline In ₂ Se ₃ S. Kaneko, Y. Watanabe, H. Kawazoe, M. Yamane, H. Inokuchi, H. Fujimoto, and K. Kamiya	68
35. Ultraviolet Photoemission Study of Polythiophene Oligomers (III) H. Fujimoto, K. Seki, U. Nagashima, H. Nakahara, J. Nakayama, M. Hoshino, K. Fukuda, and H. Inokuchi	70
36. Photoemission Study on the Electronic Structures of Pc ₂ Lu and (PcAlF) _n M. R. Fahy, H. Fujimoto, A. J. Dann, H. Hoshi, Y. Maruyama, H. Inokuchi, and M. R. Willis	72
37. UPS for Vinylthiophene Oligomer and Its LB Films H. Nakahara, J. Nakayama, T. Fujimori, M. Hoshino, K. Fukuda, H. Fujimoto, H. Inokuchi, and K. Seki	74
38. UV Photoelectron Spectroscopy of Poly(tetrafluoroethylene) (CF ₂) _n K. Seki, H. Tanaka, T. Ohta, Y. Aoki, A. Imamura, H. Fujimoto, and H. Inokuchi	76

39. Angle-Resolved Photoelectron Spectroscopy on Langmuir-Blodgett Films of Copper Tetrakis(n-butoxycarbonyl)phthalocyanine N. Ueno, K. Kamiya, M. Takahashi, H. Nakahara, K. Ogawa, H. Yonehara, K. Fukuda, K. Seki, and H. Inokuchi	78
40. Surface CN ⁻ Centers on KCl Crystals H. Nakagawa, A. Fukumoto, H. Matsumoto, M. Fujita, T. Miyanaga, K. Fukui, and M. Watanabe	80
41. Synchrotron Radiation Excited Chemical Vapor Deposition of Hydrogenated Amorphous Silicon Films H. Ohashi, A. Yoshida, and K. Shobatake	82
42. VUV-Assisted Silicon Epitaxy Using Silane M. Suemitsu, F. Hirose, K. Chiba, H. Sakamoto, J. Ishibe, M. Niwano, and N. Miyamoto	84
43. Patterned Polymerization of Styrene by SR-CVD T. Hayakawa, T. Tashiro, H. Yamada, S. Morita, S. Hattori, H. Ohashi, and K. Shobatake	86
44. Growth of SiO ₂ Thin Film by Photo-CVD Using Synchrotron Orbital Radiation M. Okuyama, M. Nakamura, and Y. Hamakawa	88
45. Defects in Hydrogenated Amorphous Silicon Films Induced by Synchrotron Irradiation Y. Saito and A. Yoshida	90
46. X-Ray Reflectivity of Gold Mirror in 1.7 - 5 keV Region K. Yamashita, S. Kitamoto, I. Hatsukade, M. Ohtani, K. Tamura, I. Yamada, and Y. Hashimoto	92
47. Soft X-ray Microscope with Zone Plates at UVSOR N. Watanabe, M. Taniguchi, Y. Shimanuki, K. Kawasaki, Y. Watanabe, Y. Nagai, and H. Kihara	94
48. Far-Infrared Absorption by Metal Microcrystals S. Mochizuki and K. Ishi	96
49. Far-Infrared Spectra of Hydrogen-Bonded Ferroelectrics KH ₂ PO ₄ (KDP) and PbHPO ₄ (LHP) S. Shin, Y. Chiba, A. Sugawara, Y. Tezuka, and M. Ishigame	98
50. Effect of Pressure on the Interaction-Induced Far-Infrared Absorption of Liquid Carbon Tetrachloride and Liquid Benzene Y. Fujita and S. Ikawa	100
51. Reflectivity of High T _c Superconductor Bi ₂ Sr ₂ Ca _{1-x} Y _x Cu ₂ O ₈ X. Wang, T. Nanba, T. Takahashi, S. Yasuda, F. Arai, M. Ikezawa, H. Yoshida, T. Takahashi, T. Suzuki, and T. Kasuya	102

Abstracts of International Symposium on VUV-SX Physics and Chemistry

1. Program	105
2. Core Excitation in GeTe, SnTe and PbTe both in Amorphous and Crystalline Phases K. Fukui	107
3. Cr 3d Partial Density of States and p-d Hybridization in Ferromagnetic Semiconductor CdCr ₂ Se ₄ M. Taniguchi, A. Fujimori, and S. Suga	108
4. Testing High Temperature Superconductivity Models Using Synchrotron Radiation Photoemission M. Onellion	109
5. Photoemission Studies of High-T _c Superconductors and Related Compounds A. Fujimori	110
6. Photoemission and Inverse Photoemission Study of Transition Metal Intercalated and Surface Adsorbed TiS ₂ S. Suga	111
7. Current Status and Future Prospects for Ultra-soft X-ray Spectroscopy J. Nordgren	112
8. Soft X-ray Fluorescent Spectra of Lanthanum Compounds S. Nakai	113
9. Time-Resolved Luminescence Studies of Alkali Halide Crystals Using Single-Bunched Light Pulses from UVSOR Y. Nakai	114
10. Fluorescence Studies of Biosystems I. H. Munro	115
11. Anisotropic XANES Studies of Oriented Molecular Solids and Polymers K. Seki	116
12. UPS Studies of Model Systems of Polyethylene and Polythiophene H. Fujimoto	117
13. Structural Studies of Surfaces Using Soft X-ray Methods P. Woodruff	118
14. Angle-Resolved Photoemission from Thin Crystalline Oxide Films Y. Sakisaka	119
15. Circular Dichroism and Spin Polarization in Photoemission from Adsorbates G. Schönhense	120
16. Theory of Resonant Photoemission from Surface Core Excitons of GaAs (110) K. Cho, Y. Takeda, and Y. Miyamoto	121

17. New Triple Coincidence Techniques Applied to Multiple Ionisation of Molecules K. Codling, L. J. Frasinski, P. A. Hatherly, and M. Stankiewicz	122
18. Photoelectron Spectroscopy of Laser-Excited Aligned Free Atoms P. Zimmermann	123
19. Symmetry-Resolved Photoabsorption Spectroscopy of Diatomic and Triatomic Molecules A. Yagishita	124
20. Photoionization Quantum Yields of Simple Molecules M. Ukai	125
21. Dissociative Ionisation in Molecules by Threshold Electron-Ion Coincidences. Role of Autoionisation O. Dutuit	126
22. Dissociative Double Photoionization of Some Polyatomic Molecules T. Masuoka, I. Koyano, and S. Nagaoka	127
23. Photoelectron-Photoelectron Coincidence Spectroscopy J. H. D. Eland and S. D. Price	128
24. Absorption and Fluorescence Spectroscopy of Jet-Cooled Molecules and Clusters A. Hiraya and K. Shobatake	129
25. Photoionization Efficiency Curves of Water-Ethylene Clusters T. Hirayama, H. Shiromaru, S. Nagaoka, and K. Kimura	130
26. C ₆₀ Clusters Buckminsterfullerene, the Key to Icosahedral Graphite and Spheroidal Soot Particles H. W. Kroto	131
27. Synchrotron Radiation and Muscle Research J. Bordas	132
28. Synchrotron Radiation-Assisted Etching Reactions and Chemical Vapor Deposition K. Shobatake	133

APPENDIX

1. Organization	135
2. Joint Studies	136
3. List of Publications	137
4. Plan View of UVSOR Facility	140
5. Plan View of UVSOR Storage Ring Associated with Beamlines	141
6. Intensity Distribution of Synchrotron Radiation from UVSOR	141
7. Main Parameters of UVSOR	142
8. Beam Lines at UVSOR	143
9. Location	144
